

Triple Sign System AB is a Swedish-based technology company founded in 1998 by the former owners of World Sign International AB – the leading manufacturer of quality three message billboards. The company was created specifically to develop and market an innovation in triplesign technology, the cardboard prism, which facilitates the change of the message.* Strong, light, easy to assemble, cost-effective and recyclable, we believe that our ground-breaking system is the future of three message sign marketing. It is also flexible, allowing for whether our customers want new signs or their existing ones to be easily converted for this purpose. We feel that this new technology will be of particular benefit to media operators and retail chains.

Design your own combinations...

...to create variations on a theme...

Timer

► standard features include:

- Internal illumination
- Choice of red or blue sign
- Timer to adjust display time
- Mounting kit, incl. screws suitable for different wall types

▶ motion engages the attention

The fundamental principle of all promotion is to engage the attention of the viewer. People may pass their eyes over a static image, but they watch a moving one; they are engaged by the motion.

...so that a single image changes as you watch.

▶ your imagination is the limit

Advanced control system

▶ extra features:

- Choice of any colour code.
- Advanced control system with multiple options, including specific display timing or synchronising of separate displays
- Front cover key lock
- Customised frame, to your own specifications
- Logotypes on frame

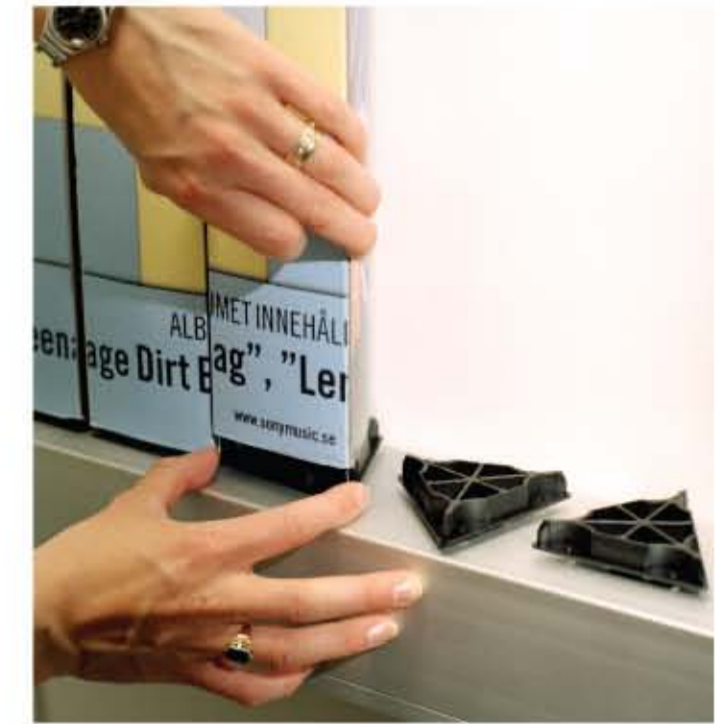

► design

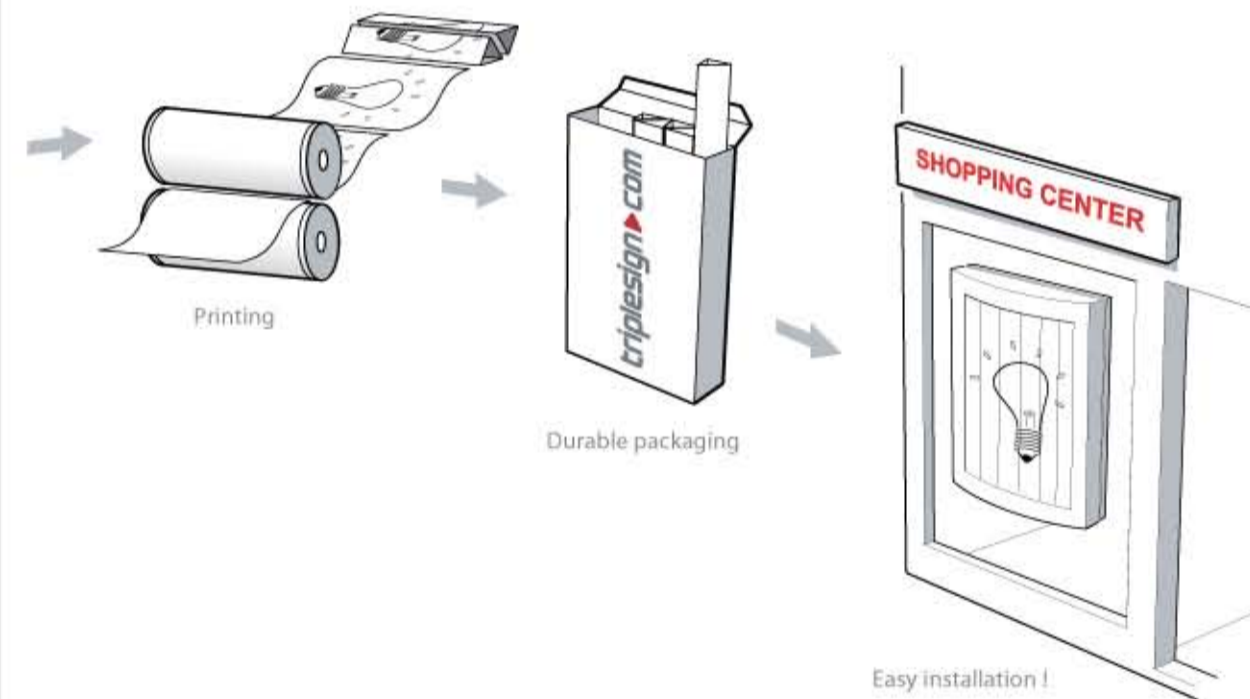

Our system combines established design excellence with a simplicity and cost-effectiveness that has not been achievable until now. The triplesign system is available in a wide variety of formats for indoor as well as outdoor use – vertical as well as horizontal.

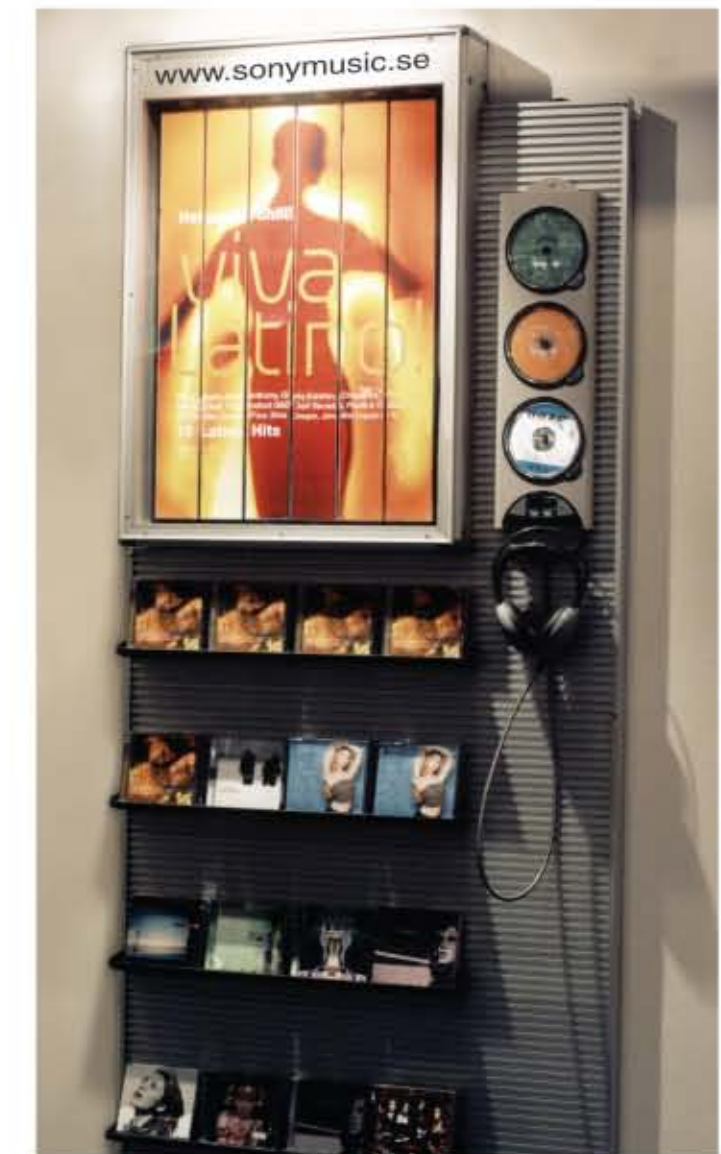

No need for skilled personnel.

Just clip in the prisms for three new messages in 30 seconds.

► customise to your own specifications

You have multiple options:

- Wall-mounted triplesign
- Free-standing triplesign with static sign on back
- Triplesign, combined with backlit product cabinet \ stand
- Double-sided triplesign with possibility of multiple stacked or hanging display
- Outdoor triplesign
- Or customise to create your own unique display

Compact, light and strong. The prisms come in a box that is hard to damage and is delivered direct to retailers. Design Patent Pending.

Change your message quickly and easily.

► pre-printed prisms

The three-message system consists of printed triangular prisms made out of cardboard. * The prisms do not rotate simultaneously, but in a smooth, wave motion more pleasing to the eye. The prisms are light but durable – easy to transport, but hard to damage in transit. They can be inserted and removed from the sign quickly and with no difficulty. After use, the prisms are disposable and recyclable, making them both cost-effective and environmentally friendly. Depending on volume, the printing can be either digital, screen or offset.
